Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 18 December 2009.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-5, 7-10, and 14-17 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Jorgensen (2,617,005). The reference discloses an animal bed including a movable floor 10, heating elements 12, 14, separate actuator element 3, and a power cord.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 6 is rejected under 35 U.S.C. 103(a) as being unpatentable over Jorgensen (2,617,005) in view of Goldston et al (5,303,485). Jorgensen fails to disclose the use of the specific actuator. Goldston et al provides an alternative solution to a pressure sensitive switch and discloses the use of a transistor in place of such a switch (Column 9, Lines 4-15). Therefore, it would have been obvious to one of ordinary skill in the art at the time the invention to provide a transistor as the actuator to provide a more sophisticated switching means responsive to the presence or absence of the weight of an animal since a predictable result would ensue.

Claims 11, 12, 18, and 19 are rejected under 35 U.S.C. 103(a) as being unpatentable over Jorgensen (2,617,005) in view of Peeples et al (6,237,531). Jorgensen fails to disclose the specific structure of the animal bed including a wall and opening. Such structure is conventional in the art as disclosed by Peeples et al as shown in Figures 1 and 2. Given this teaching, it would have been obvious to form the animal bed of Jorgensen with such features since a predictable result would ensue.

Claims 13 and 20 are rejected under 35 U.S.C. 103(a) as being unpatentable over Jorgensen (2,617,005) in view of Elbert et al (3,041,441). Jorgensen discloses preset thermostats 16, 17. Elbert et al disclose the use of an adjustable thermostat 62 in a heating mat. Given this teaching, it would have been obvious to employ an adjustable thermostat in Jorgensen to better control the heating of the animal bed since a predictable result would ensue.

Response to Arguments

Applicant's arguments with respect to claims 1-20 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period

will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
